

MEETING REPORT

Team Name: Police Management System

Date of Meeting: 04.03.2024

Start Time: 9:30

End Time: 11:00

Meeting Location: Epoka University Campus

Moderator: Ester Alisufi

Recorder: Ester Alisufi

Other Members Present: Adorela Dashi , Ester Alisufi , Kaltrina Lala , Amarildo Hazizi , Drini Ziri , Egzon Xheleshi , Petro Boci

Members Absent: None

Topics Discussed:

During the first meeting, the group discussed the main idea of the project, which is the development of a **Police Management System**. We talked about the purpose of the system and the problems it aims to solve, such as manual paperwork, difficulty in tracking cases, and lack of crime location visualization.

We also discussed the main users of the system:

- Administrator
- Police Officer
- Detective/Investigator

Additionally, we discussed the main features of the system, including case management, suspect and evidence management, report generation, and the map-based crime tracking system.

Decisions Made:

- The project will be a **web-based application**.
- The system will include **role-based access control**.
- The system will include a **map for crime location visualization** as the main innovative feature.
- The team agreed on the name **Police Management System**.
- Technologies that may be used were discussed (e.g., database, web development technologies).

Tasks Assigned:

- Research on similar systems and project ideas.
- Define system users and main features.
- Work on initial UI ideas and sketches.
- Write user stories and discuss system requirements.
- Set up project repository and organize files.
- Discuss system architecture and database ideas.
- Participate in project planning and meetings.

Time, Place, and Agenda for Next Meeting:

Next Meeting Date: 23.03.2026

Place: Epoka University Campus

Agenda:

- Present system requirements
- Present database structure
- Discuss system architecture
- Start system design
- Write user stories
